

Wet Combing

This is a non-insecticide alternative to lotions that involves combing out all lice with a fine-toothed detection comb using the wet combing method described below.

1. SHAMPOO THE HAIR, APPLY LOTS OF CONDITIONER AND USE A WIDE-TOOTHED COMB TO UNTANGLE AND STRAIGHTEN.

2. SPLIT THE HAIR INTO SECTIONS AND WORK ON ONE SECTION AT A TIME. COMB WITH THE FINE-TOOTHED COMB FROM ROOT TO END. PAY PARTICULAR ATTENTION TO THE BACK OF THE NECK AND THE AREA AROUND THE EARS.

3. CHECK THE COMB FOR LIVE LICE BETWEEN EACH STROKE BY CLEANING IT ON A TISSUE. REMOVE ANY LICE FOUND.

4. WHEN THE WHOLE HEAD OF HAIR HAS BEEN CHECKED, RINSE OFF THE CONDITIONER.

To be effective, wet combing needs to be repeated every three days for up to three weeks to ensure that all head lice are removed.

Continue until you no longer find any lice for at least 2 treatments in a row.
